

CERTIFIED CANINE REHABILITATION PRACTITIONER - CCRP -

PROGRAM DESCRIPTION

This program is a sequence of postgraduate courses for veterinarians, physical therapists, technicians, followed by a supervised clinical experience and a cumulative examination. The courses are designed to guide the practitioner through the theoretical foundations to the clinical applications of canine rehabilitation.

Functional anatomy and performance physiology
 Immobilization and remobilization

Rehabilitation techniques like

- Thermotherapy / Therapeutic Ultrasound
- Electrotherapy / TENS
- Laser
- Active Exercises including hydrotherapy
- Passive Range Of Motion exercises (PROM)

Managing the patient with osteoarthritis

Designing and implementing rehab programs

Winner of the award:

Outstanding Non-Credit Program Award
 by the Association for Continuing Higher Education.

GOAL

Our goal is to educate professionals who share a common interest in helping animals recover from illness and/or injury, and to help animals to live life to the fullest with minimal pain and discomfort.

We are an institution of professional higher learning where you, your learning, and your needs are the focus.

ADVANTAGES OF PHYSICAL THERAPY

- Much faster postoperative rehabilitation
- Effective conservative treatment of orthopedic and neurological diseases
- Effective pain management
- Management of sport dogs and working dogs
- Improved customer satisfaction

SPECIAL FEATURES OF THIS COURSE

- Instructors are the leaders in veterinary rehabilitation and have written the most important books and scientific literature regarding rehabilitation and physical medicine.
- Effective knowledge transfer in a compact seminar instead of a two-year program
- Extensive hands-on training
- Small group sizes for effective learning
- Evidence-based medicine approach
